

CLIMATE CONTRIBUTION

Trendkost Promotionagentur GmbH supports the following UN goals for sustainable development:

Trendkost Promotionagentur GmbH

Trendkost
Promotionagentur

Participant ID: DE-4023-0530
Valid until: 03.06.2027

This certificate guarantees that the reported quantity of 7 tons CO₂ has been calculated according to Greenhouse Gas Protocol Standard, scopes 1, 2 and 3. The resulting emissions have been saved in Gold Standard tested climate projects.

Trendkost Promotionagentur GmbH has acquired shares (certificates) in climate protection projects corresponding to the calculated volume of CO₂ and therefore plays a transparent part in the realisation of the projects. This ensures that the company compensates for its own CO₂ emissions, and thus scales back the rise in global warming.

The projects have been certified, and the issue and closure of the certificates is registered transparently.

Trendkost Promotionagentur GmbH is therefore a voluntary participant in emissions trading, and thus makes a contribution to maintaining a viable environment by reducing the emissions of greenhouse gases. The holder of this certificate makes a sustainable contribution to the commitment to tackle global warming.

BUNDLED SOLAR PHOTOVOLTAIC PROJECT BY ACME

India

The proposed project activity is a step towards supporting the implementation and installation of grid connected renewable solar energy power plants in India. The implementation of project activity ensures energy security, diversification of the grid generation mix and sustainable growth of the electricity generation sector in India. The main goal of project activity is to implement renewable energy projects in the country and the significant importance of revenues from sale of Verified Carbon Units (VCUs) to achieve this goal forms the basis of the implementation of this project activity. The project activity is a voluntary action and each SPV will be the Project Proponent for their project activity. ACME Cleantech Solutions Private Limited as a parent company formed different SPV (Special Purpose Vehicles) for solar projects and projects are developed by name of SPVs. There are no mandatory laws or regulations existing in India requiring PP or any other party to develop a programme for renewable generation plants.

Burn Stoves Project Jikokoa

Kenya

The BURN Jikokoa Stoves project allows families in rural Kenya to cook food using cleaner, more efficient cook stoves, thereby consuming less charcoal. Communities typically use wood and charcoal to fuel open fires and inefficient cook stoves, creating indoor air pollution, releasing CO2 emissions and creating pressure on local forests. The Burn Stove Project manufactures and distributes the market-leading 'Jikokoa' stove locally, employing more than 400 people in sales, manufacturing and distribution – 60% of whom are women.

The stove's 'natural draft' technology reduces fuel consumption by up to 45% and cooking time by up to 50%, saving families up to \$300 on fuel a year. In 2015, Burn's innovative design was recognised by the internationally renowned Ashden sustainability awards.
